With these tenets in place, Heuser offers practical ideas for developing students natural faculties in math and science by applying advances in research to proven workshop techniques. Just like in literacy workshops, students engage in hands-on learning, choice, reflection, inquiry, and problem-solving as they deepen their understanding of math and science. Teachers widen their understanding of great teaching, too, as they see the powerful synergies between successful literacy education and successful math and science education at work in their classrooms. Practical, research-based, and forward-thinking, *Reworking the Workshop* takes teachers through every step of reforming their classroom: from planning curriculum, teaching minilessons, managing hands-on activities, and encouraging reflection, to assessing student learning.
