BRAND NEW, The Resilience of the Electric Power Delivery System in Response to Terrorism and Natural Disasters: Summary of a Workshop, Planning Committee for the Workshop on the Resilience of the Electric Power System to Terrorism and Natural Disasters, Board on Energy and Environmental Systems, Division on Engineering and Physical Sciences, National Research Council, David W. Cooke, The Resilience of the Electric Power Delivery System in Response to Terrorism and Natural Disasters is the summary of a workshop convened in February 2013 as a follow-up to the release of the National Research Council report Terrorism and the Electric Power Delivery System. That report had been written in 2007 for the Department of Homeland Security, but publication was delayed because of security concerns. While most of the committee's findings were still relevant, many developments affecting vulnerability had occurred in the interval. The 2013 workshop was a discussion of the committee's results, what had changed in recent years, and how lessons learned about the grid's resilience to terrorism could be applied to other threats to the grid resulting from natural disasters. The purpose was not to translate the entire
